FOR IMMEDIATE RELEASE

HEDBERG INTRODUCES PRAIRIE stone ARCHITECTURAL MASONRY PRODUCTS

MINNEAPOLIS, MN (November 10, 2009) — Hedberg Aggregates, Inc., dba Hedberg Landscape & Masonry Supplies, is pleased to add PRAIRIE stone to its product offering list for architects designing institutional, commercial and/or industrial projects. PRAIRIE stone, a high-density, pre-finished architectural concrete masonry unit made of 87% crushed limestone, offers the beauty of natural stone with the advantages of concrete masonry. PRAIRIE stone will be on display at Hedberg booth #503 at the AIA Conference and Expo this week at the Minneapolis Convention Center.

“PRAIRIE stone has the look and feel of quarried limestone because it’s made of *real* limestone, said Tina Plant, Hedberg’s Chief Marketing Officer. “Building projects end up with the best of both worlds – the elegant look of natural limestone and the advantages and structural integrity of concrete masonry”.

“In today’s challenging economy, PRAIRIE stone is an economical design choice that provides great flexibility, short lead times and excellent consistency,” she continued. “It expands the architects’ design capabilities – but not their budgets”.

PRAIRIE stone, available in a wide variety of shapes, sizes and natural colors, can be ordered as wall block, archway pieces, coping units, sill pieces and custom designed units, to satisfy the most discerning customer. It can also be cut, ground or split at the jobsite. It is durable, mold and moisture resistant, and requires virtually no maintenance.

Samples and brochures on PRAIRIE stone are available at Hedberg’s masonry location at 975 Nathan Lane North in Plymouth, Minnesota.

Founded in 1987, Hedberg is Minnesota’s largest wholesale and retail supplier of landscape hardgoods and masonry products including natural stone, manufactured stone, water garden supplies and custom stone fabrication. For more information, call 763-225-0540 or visit www.hedbergrocks.com.
