We reserve the right to cancel a class.

HEDBERG 2010 DIY SEMINAR DESCRIPTIONS

(In alphabetical order)

<p style="text-align: center;">Algae! Ponds, Plants & Fish</p> <p>This seminar will cover pond set up, clean up and summertime maintenance tips for your pond, water plants and fish. Come with all your questions and our water gardening experts will help point you in the right direction.</p>	<p style="text-align: center;">Outdoor Container Gardening</p> <p>Don Engebretson, a nationally recognized authority on landscaping and garden design, will be giving his seminar – “<i>Crafting Cool & Creative Containers</i>” at our Hedberg-Stillwater location on Saturday, May 15. In this fun seminar, Don will show how to use containers as singles and in groups, demonstrate the design secrets to creating artistic, long-lasting container arrangements, and share his tips on creative ways to use containers throughout the landscape. Check out his web site, RenegadeGardener.com for more information.</p>
<p>Blue Thumb – Raingarden Seminar – How to</p> <p>The easiest way to help water infiltrate into the ground – rather than run off into storm sewers – is to create a raingarden. Find out how you can strategically place one on your site. Go to www.bluethumb.org for printable raingarden plans & then attend this seminar.</p>	<p style="text-align: center;">Outdoor Fireplace Construction 101</p> <p>A Fire Rock pre-molded fireplace takes half the cost and half the time than installing a traditional masonry fireplace. Learn how to install one of these kits – including how to install thin veneer for a beautiful finish. Use of cleaners and sealers will also be discussed.</p>
<p>Building Natural Stone Walls, Patios & Walks</p> <p>Whether building a stone wall, patio or walkway, you’ll need to choose, order and work with your stone. You’ll also need to prepare your base and level sand. This seminar will give you all the tips you need for a successful project.</p>	<p style="text-align: center;">Ready! Get Set! Go! Spring Pond Start Up</p> <p>We’ll give you a Spring Cleaning Check Off List to get your pond up and running in the spring. We recommend a thorough cleaning of your pond every year – and we’ll tell you how and when.</p>
<p>Fire Pit Construction (w/boulders or pavers)</p> <p>It’s just six easy steps to build your own fire pit using a 36” corrugated fire ring. Whether you use small boulders to surround your fire ring or pavers, you’ll be up and running in no time. We’ll show you how.</p>	<p style="text-align: center;">Water Feature Construction</p> <p>Our expert staff will help you design & build your very own backyard paradise. We recommend the Aquascape 20-Step Pond Kit – variety of sizes and pumps available.</p>
<p style="text-align: center;">Installing Concrete Pavers</p> <p>The key elements of paving will be covered: existing subgrade, base, bedding course, concrete pavers, edge restraints and joint sand. We’ll give you step by step instructions to build your own paver patio and/or walkway.</p>	<p style="text-align: center;">Water Garden Winterization</p> <p>At Hedberg, we’ll show you options for over-wintering pumps, plants and fish. With Minnesota’s severe winter climate, you’ll want to follow our professional tips.</p>
<p style="text-align: center;">Installing Concrete Retaining Walls</p> <p>Retaining walls taller than 4 feet are best left to the professionals. Thinking of building something shorter? You’ll want to attend this seminar and get installation guidelines and tips.</p>
